PHPBB_LINKS_ENABLED	Enable phpBB linkage?	Should Zen Cart synchronize new account information to your (already-installed) phpBB forum?
SHOW_COUNTS_ADMIN	Show Category Counts - Admin	Show Category Counts in Admin?

Minimum Values == The minimum values for functions / data (2)

ENTRY_FIRST_NAME_MIN_LENGTH	First Name	Minimum length of first name
ENTRY_NICK_MIN_LENGTH	Nick Name	Minimum length of Nick Name
ENTRY_LAST_NAME_MIN_LENGTH	Last Name	Minimum length of last name
ENTRY_DOB_MIN_LENGTH	Date of Birth	Minimum length of date of birth
ENTRY_EMAIL_ADDRESS_MIN_LENGTH	E-Mail Address	Minimum length of e-mail address
ENTRY_STREET_ADDRESS_MIN_LENGTH	Street Address	Minimum length of street address
ENTRY_COMPANY_MIN_LENGTH	Company	Minimum length of company name
ENTRY_POSTCODE_MIN_LENGTH	Post Code	Minimum length of post code
ENTRY_CITY_MIN_LENGTH	City	Minimum length of city
ENTRY_STATE_MIN_LENGTH	State	Minimum length of state
ENTRY_TELEPHONE_MIN_LENGTH	Telephone Number	Minimum length of telephone number
ENTRY_PASSWORD_MIN_LENGTH	Password	Minimum length of password
CC_OWNER_MIN_LENGTH	Credit Card Owner Name	Minimum length of credit card owner name
CC_CVV_MIN_LENGTH	Credit Card CVV Number	Minimum length of credit card CVV number
CC_NUMBER_MIN_LENGTH	Credit Card Number	Minimum length of credit card number
REVIEW_TEXT_MIN_LENGTH	Product Review Text	Minimum length of product review text
MIN_DISPLAY_BESTSELLERS	Best Sellers	Minimum number of best sellers to display
MIN_DISPLAY_ALSO_PURCHASED	Also Purchased Products	Minimum number of products to display in the 'This Customer Also Purchased' box

Maximum Values == The maximum values for functions / data (3)

MAX_ADDRESS_BOOK_ENTRIES	Address Book Entries	Maximum address book entries a customer is allowed to have
MAX_DISPLAY_SEARCH_RESULTS	Search Results Per Page	Number of products to list on a search result page
MAX_DISPLAY_PAGE_LINKS	Prev/Next Navigation Page Links	Number of 'number' links use for page-sets
MAX_DISPLAY_SPECIAL_PRODUCTS	Products on Special	Number of products on special to display
MAX_DISPLAY_NEW_PRODUCTS	New Products Module	Number of new products to display in a category
MAX_DISPLAY_UPCOMING_PRODUCTS	Upcoming Products	Number of 'upcoming' products to display
MAX_MANUFACTURERS_LIST	Manufacturers List - Scroll Box Size/Style	Number of manufacturers names to be displayed in the scroll box window. Setting this to 1 or 0 will display a dropdown list.
MAX_MUSIC_GENRES_LIST	Music Genre List - Scroll Box Size/Style	Number of music genre names to be displayed in the scroll box window. Setting this to 1 or 0 will display a dropdown list.
MAX_RECORD_COMPANY_LIST	Record Company List - Scroll Box Size/Style	Number of record company names to be displayed in the scroll box window. Setting this to 1 or 0 will display a dropdown list.
PRODUCTS_MANUFACTURERS_STATUS	Manufacturers List - Verify Product Exist	Verify that at least 1 product exists and is active for the manufacturer name to show Note: When this feature is ON it can produce slower results on sites with a large number of products and/or manufacturers 0= off 1= on
MAX_DISPLAY_MANUFACTURER_NAME_LEN	Length of Manufacturers Name	Used in manufacturers box; maximum length of manufacturers name to display. Longer names will be truncated.
MAX_DISPLAY_MUSIC_GENRES_NAME_LEN	Length of Music Genre Name	Used in music genres box; maximum length of music genre name to display. Longer names will be truncated.
MAX_DISPLAY_RECORD_COMPANY_NAME_LEN	Length of Record Company Name	Used in record companies box; maximum length of record company name to display. Longer names will be truncated.
MAX_DISPLAY_NEW_REVIEWS	New Product Reviews Per Page	Number of new reviews to display on each page
MAX_RANDOM_SELECT_REVIEWS	Random Product Reviews For Box	Number of random product reviews to rotate in the box
MAX_RANDOM_SELECT_NEW	Random New Products For Box	Number of random new product to display in box
MAX_RANDOM_SELECT_SPECIALS	Random Products On Special For Box	Number of random products on special to display in box
MAX_DISPLAY_CATEGORIES_PER_ROW	Categories To List Per Row	How many categories to list per row
MAX_DISPLAY_PRODUCTS_NEW	New Products Listing- Number Per Page	Number of new products' listings per page
MAX_DISPLAY_BESTSELLERS	Best Sellers For Box	Number of best sellers to display in box
MAX_DISPLAY_ALSO_PURCHASED	Also Purchased Products	Number of products to display in the 'This Customer Also Purchased' box
MAX_DISPLAY_PRODUCTS_IN_ORDER_HISTORY_BOX	Recent Purchases Box- NOTE: box is disabled	Number of products to display in the recent purchases box
MAX_DISPLAY_ORDER_HISTORY	Customer Order History List Per Page	Number of orders to display in the order history list in 'My Account'
MAX_DISPLAY_SEARCH_RESULTS_CUSTOMER	Maximum Display of Customers on Customers Page	
MAX_DISPLAY_SEARCH_RESULTS_ORDERS	Maximum Display of Orders on Orders Page	
MAX_DISPLAY_SEARCH_RESULTS_REPORTS	Maximum Display of Products on Reports	
MAX_DISPLAY_RESULTS_CATEGORIES	Maximum Categories Products Display List	Number of products to list per screen
MAX_ROW_LISTS_OPTIONS	Products Attributes - Option Names and Values Display	Maximum number of option names and values to display in the products attributes page
MAX_ROW_LISTS_ATTRIBUTES_CONTROLLER	Products Attributes - Attributes Controller Display	Maximum number of attributes to display in the Attributes Controller page
MAX_DISPLAY_SEARCH_RESULTS_DOWNLOADS_MANAGER	Products Attributes - Downloads Manager Display	Maximum number of attributes downloads to display in the Downloads Manager page

Maximum Values == The maximum values for functions / data (3)

MAX_DISPLAY_SEARCH_RESULTS_FEATURED_ADMIN	Featured Products - Number to Display Admin	Number of featured products to list per screen - Admin
MAX_DISPLAY_SEARCH_RESULTS_FEATURED	Maximum Display of Featured Products - Main Page	Number of featured products to list on main page
MAX_DISPLAY_PRODUCTS_FEATURED_PRODUCTS	Maximum Display of Featured Products Page	Number of featured products to list per screen
MAX_DISPLAY_PRODUCTS_LISTING	Products Listing- Number Per Page	Maximum Number of Products to list per page on main page
MAX_RANDOM_SELECT_FEATURED_PRODUCTS	Random Featured Products For Box	Number of random featured products to display in box
MAX_DISPLAY_SPECIAL_PRODUCTS_INDEX	Maximum Display of Specials Products - Main Page	Number of special products to list on main page
SHOW_NEW_PRODUCTS_LIMIT	New Product Listing - Limited to ...	Limit the New Product Listing to 0= All Products 1= Current Month 7= 7 Days 14= 14 Days 30= 30 Days 60= 60 Days 90= 90 Days 120= 120 Days
MAX_DISPLAY_PRODUCTS_ALL	Maximum Display of Products All Page	Number of products to list per screen
MAX_LANGUAGE_FLAGS_COLUMNS	Maximum Display of Language Flags in Language Side Box	Number of Language Flags per Row
MAX_FILE_UPLOAD_SIZE	Maximum File Upload Size	What is the Maximum file size for uploads? Default= 2048000
UPLOAD_FILENAME_EXTENSIONS	Allowed Filename Extensions for uploading	List the permissible filetypes (filename extensions) to be allowed when files are uploaded to your site by customers. Separate multiple values with commas(.). Do not include the dot(.). Suggested setting: "jpg,jpeg,gif,png,eps,ai,pdf,tif,tiff,bmp,zip"
MAX_DISPLAY_RESULTS_ORDERS_DETAILS_LISTING	Maximum Orders Detail Display on Admin Orders Listing	Maximum number of Order Details 0 = Unlimited
MAX_DISPLAY_SEARCH_RESULTS_PAYPAL_IPN	Maximum PayPal IPN Display on Admin Listing	Maximum number of PayPal IPN Listings in Admin Default is 20
MAX_DISPLAY_PRODUCTS_TO_CATEGORIES_COLUMNS	Maximum Display Columns Products to Multiple Categories Manager	Maximum Display Columns Products to Multiple Categories Manager 3 = Default
MAX_DISPLAY_SEARCH_RESULTS_EZPAGE	Maximum Display EZ-Pages	Maximum Display EZ-Pages 20 = Default

Images == Image parameters (4)

SMALL_IMAGE_WIDTH	Small Image Width	The pixel width of small images
SMALL_IMAGE_HEIGHT	Small Image Height	The pixel height of small images
HEADING_IMAGE_WIDTH	Heading Image Width - Admin	The pixel width of heading images in the Admin NOTE: Presently, this adjusts the spacing on the pages in the Admin Pages or could be used to add images to the heading in the Admin
HEADING_IMAGE_HEIGHT	Heading Image Height - Admin	The pixel height of heading images in the Admin NOTE: Presently, this adjusts the spacing on the pages in the Admin Pages or could be used to add images to the heading in the Admin
SUBCATEGORY_IMAGE_WIDTH	Subcategory Image Width	The pixel width of subcategory images
SUBCATEGORY_IMAGE_HEIGHT	Subcategory Image Height	The pixel height of subcategory images
CONFIG_CALCULATE_IMAGE_SIZE	Calculate Image Size	Calculate the size of images?
IMAGE_REQUIRED	Image Required	Enable to display broken images. Good for development.
IMAGE_SHOPPING_CART_STATUS	Image - Shopping Cart Status	Show product image in the shopping cart? 0= off 1= on
IMAGE_SHOPPING_CART_WIDTH	Image - Shopping Cart Width	Default = 50
IMAGE_SHOPPING_CART_HEIGHT	Image - Shopping Cart Height	Default = 40
CATEGORY_ICON_IMAGE_WIDTH	Category Icon Image Width - Product Info Pages	The pixel width of Category Icon heading images for Product Info Pages
CATEGORY_ICON_IMAGE_HEIGHT	Category Icon Image Height - Product Info Pages	The pixel height of Category Icon heading images for Product Info Pages
MEDIUM_IMAGE_WIDTH	Product Info - Image Width	The pixel width of Product Info images
MEDIUM_IMAGE_HEIGHT	Product Info - Image Height	The pixel height of Product Info images
IMAGE_SUFFIX_MEDIUM	Product Info - Image Medium Suffix	Product Info Medium Image Suffix Default = _MED
IMAGE_SUFFIX_LARGE	Product Info - Image Large Suffix	Product Info Large Image Suffix Default = _LRG
IMAGES_AUTO_ADDED	Product Info - Number of Additional Images per Row	Product Info - Enter the number of additional images to display per row Default = 3
IMAGE_PRODUCT_LISTING_WIDTH	Image - Product Listing Width	Default = 100
IMAGE_PRODUCT_LISTING_HEIGHT	Image - Product Listing Height	Default = 80
IMAGE_PRODUCT_NEW_LISTING_WIDTH	Image - Product New Listing Width	Default = 100
IMAGE_PRODUCT_NEW_LISTING_HEIGHT	Image - Product New Listing Height	Default = 80
IMAGE_PRODUCT_NEW_WIDTH	Image - New Products Width	Default = 100
IMAGE_PRODUCT_NEW_HEIGHT	Image - New Products Height	Default = 80
IMAGE_FEATURED_PRODUCTS_LISTING_WIDTH	Image - Featured Products Width	Default = 100
IMAGE_FEATURED_PRODUCTS_LISTING_HEIGHT	Image - Featured Products Height	Default = 80
IMAGE_PRODUCT_ALL_LISTING_WIDTH	Image - Product All Listing Width	Default = 100
IMAGE_PRODUCT_ALL_LISTING_HEIGHT	Image - Product All Listing Height	Default = 80
PRODUCTS_IMAGE_NO_IMAGE_STATUS	Product Image - No Image Status	Use automatic No Image when none is added to product 0= off 1= On
PRODUCTS_IMAGE_NO_IMAGE	Product Image - No Image picture	Use automatic No Image when none is added to product Default = no_picture.gif
PROPORTIONAL_IMAGES_STATUS	Image - Use Proportional Images on Products and Categories	Use Proportional Images on Products and Categories? NOTE: Do not use 0 height or width settings for Proportion Images 0= off 1= on

Customer Details == Customer account configuration (5)

ACCOUNT_GENDER	Email Salutation	Display salutation choice during account creation and with account information
ACCOUNT_DOB	Date of Birth	Display date of birth field during account creation and with account information NOTE: Set Minimum Value Date of Birth to blank for not required Set Minimum Value Date of Birth > 0 to require
ACCOUNT_COMPANY	Company	Display company field during account creation and with account information
ACCOUNT_SUBURB	Address Line 2	Display address line 2 field during account creation and with account information
ACCOUNT_STATE	State	Display state field during account creation and with account information
ACCOUNT_STATE_DRAW_INITIAL_DROPDOWN	State - Always display as pulldown?	When state field is displayed, should it always be a pulldown menu?
SHOW_CREATE_ACCOUNT_DEFAULT_COUNTRY	Create Account Default Country ID	Set Create Account Default Country ID to: Default is 223
ACCOUNT_FAX_NUMBER	Fax Number	Display fax number field during account creation and with account information
ACCOUNT_NEWSLETTER_STATUS	Show Newsletter Checkbox	Show Newsletter Checkbox 0= off 1= Display Unchecked 2= Display Checked Note: Defaulting this to accepted may be in violation of certain regulations for your state or country
ACCOUNT_EMAIL_PREFERENCE	Customer Default Email Preference	Set the Default Customer Default Email Preference 0= Text 1= HTML
CUSTOMERS_PRODUCTS_NOTIFICATION_STATUS	Customer Product Notification Status	Customer should be asked about product notifications after checkout success and in account preferences 0= Never ask 1= Ask (ignored on checkout if has already selected global notifications) Note: Sidebox must be turned off separately
CUSTOMERS_APPROVAL	Customer Shop Status - View Shop and Prices	Customer must be approved to shop 0= Not required 1= Must login to browse 2= May browse but no prices unless logged in 3= Showroom Only It is recommended that Option 2 be used for the purposes of Spiders if you wish customers to login to see prices.
CUSTOMERS_APPROVAL_AUTHORIZATION	Customer Approval Status - Authorization Pending	Customer must be Authorized to shop 0= Not required 1= Must be Authorized to Browse 2= May browse but no prices unless Authorized 3= Customer May Browse and May see Prices but Must be Authorized to Buy It is recommended that Option 2 or 3 be used for the purposes of Spiders
CUSTOMERS_AUTHORIZATION_FILENAME	Customer Authorization: filename	Customer Authorization filename Note: Do not include the extension Default=customers_authorization
CUSTOMERS_AUTHORIZATION_HEADER_OFF	Customer Authorization: Hide Header	Customer Authorization: Hide Header (true=hide false=show)
CUSTOMERS_AUTHORIZATION_COLUMN_LEFT_OFF	Customer Authorization: Hide Column Left	Customer Authorization: Hide Column Left (true=hide false=show)
CUSTOMERS_AUTHORIZATION_COLUMN_RIGHT_OFF	Customer Authorization: Hide Column Right	Customer Authorization: Hide Column Right (true=hide false=show)
CUSTOMERS_AUTHORIZATION_FOOTER_OFF	Customer Authorization: Hide Footer	Customer Authorization: Hide Footer (true=hide false=show)
CUSTOMERS_AUTHORIZATION_PRICES_OFF	Customer Authorization: Hide Prices	Customer Authorization: Hide Prices (true=hide false=show)
CUSTOMERS_REFERRAL_STATUS	Customers Referral Status	Customers Referral Code is created from 0= Off 1= 1st Discount Coupon Code used 2= Customer can add during create account or edit if blank NOTE: Once the Customers Referral Code has been set it can only be changed in the Admin Customer

Module Options == Hidden from configuration (6)

PRODUCTS_OPTIONS_TYPE_CHECKBOX	Check box product option type	Numeric value of the check box product option type
PRODUCTS_OPTIONS_TYPE_FILE	File product option type	Numeric value of the file product option type
PRODUCTS_OPTIONS_TYPE_RADIO	Radio button product option type	Numeric value of the radio button product option type
PRODUCTS_OPTIONS_TYPE_READONLY	Read Only option type	Numeric value of the file product option type
PRODUCTS_OPTIONS_TYPE_TEXT	Text product option type	Numeric value of the text product option type
PRODUCTS_OPTIONS_VALUES_TEXT_ID	ID for text and file products options values	Numeric value of the products_options_values_id used by the text and file attributes.
	Installed Modules	This is automatically updated. No need to edit.
ADMIN_CONFIGURATION_KEY_ON	Admin configuration_key shows	Manually switch to value of 1 to see the configuration_key name in configuration displays
ADMIN_DEMO	Admin Demo Status	Admin Demo should be on? 0= off 1= on
DEFAULT_CURRENCY	Default Currency	Default Currency
DEFAULT_LANGUAGE	Default Language	Default Language
DEFAULT_ORDERS_STATUS_ID	Default Order Status For New Orders	When a new order is created, this order status will be assigned to it.
MODULE_ORDER_TOTAL_COUPON_TAX_CLASS	Tax Class	Use the following tax class when treating Discount Coupon as Credit Note.
MODULE_ORDER_TOTAL_GV_TAX_CLASS	Tax Class	Use the following tax class when treating Gift Voucher as Credit Note.
MODULE_ORDER_TOTAL_INSTALLED	Installed Modules	List of order_total module filenames separated by a semi-colon. This is automatically updated. No need to edit. (Example: ot_subtotal.php;ot_tax.php;ot_shipping.php;ot_total.php)
MODULE_PAYMENT_CC_COLLECT_CVV	Collect & store the CVV number	Do you want to collect the CVV number. Note: If you do the CVV number will be stored in the database in an encoded format.
MODULE_PAYMENT_CC_EMAIL	Split Credit Card E-Mail Address	If an e-mail address is entered, the middle digits of the credit card number will be sent to the e-mail address (the outside digits are stored in the database with the middle digits censored)
MODULE_PAYMENT_CC_ORDER_STATUS_ID	Set Order Status	Set the status of orders made with this payment module to this value
MODULE_PAYMENT_CC_SORT_ORDER	Sort order of display.	Sort order of display. Lowest is displayed first.
MODULE_PAYMENT_CC_STATUS	Enable Credit Card Module	Do you want to accept credit card payments?
MODULE_PAYMENT_CC_STORE_NUMBER	Store the Credit Card Number	Do you want to store the Credit Card Number. Note: The Credit Card Number will be stored unencrypted, and as such may represent a security problem
MODULE_PAYMENT_COD_ORDER_STATUS_ID	Set Order Status	Set the status of orders made with this payment module to this value
MODULE_PAYMENT_COD_SORT_ORDER	Sort order of display.	Sort order of display. Lowest is displayed first.
MODULE_PAYMENT_INSTALLED	Installed Modules	List of payment module filenames separated by a semi-colon. This is automatically updated. No need to edit. (Example: cc.php;cod.php;paypal.php)
MODULE_PAYMENT_MONEYORDER_ORDER_STATUS_ID	Set Order Status	Set the status of orders made with this payment module to this value
MODULE_PAYMENT_MONEYORDER_SORT_ORDER	Sort order of display.	Sort order of display. Lowest is displayed first.
MODULE_SHIPPING_FLAT_COST	Shipping Cost	The shipping cost for all orders using this shipping method.
MODULE_SHIPPING_FLAT_SORT_ORDER	Sort Order	Sort order of display.
MODULE_SHIPPING_FLAT_STATUS	Enable Flat Shipping	Do you want to offer flat rate shipping?
MODULE_SHIPPING_FLAT_TAX_BASIS	Tax Basis	On what basis is Shipping Tax calculated. Options are Shipping - Based on customers Shipping Address Billing Based on customers Billing address Store - Based on Store address if Billing/Shipping Zone equals Store zone
MODULE_SHIPPING_FLAT_TAX_CLASS	Tax Class	Use the following tax class on the shipping fee.

Module Options == Hidden from configuration (6)

MODULE_SHIPPING_FLAT_ZONE	Shipping Zone	If a zone is selected, only enable this shipping method for that zone.
MODULE_SHIPPING_FREESHIPPER_HANDLING	Handling Fee	Handling fee for this shipping method.
MODULE_SHIPPING_FREESHIPPER_SORT_ORDER	Sort Order	Sort order of display.
MODULE_SHIPPING_FREESHIPPER_STATUS	Enable Free Shipping	Do you want to offer Free shipping?
MODULE_SHIPPING_FREESHIPPER_TAX_CLASS	Tax Class	Use the following tax class on the shipping fee.
MODULE_SHIPPING_FREESHIPPER_ZONE	Shipping Zone	If a zone is selected, only enable this shipping method for that zone.
MODULE_SHIPPING_INSTALLED	Installed Modules	List of shipping module filenames separated by a semi-colon. This is automatically updated. No need to edit. (Example: ups.php;flat.php;item.php)
MODULE_SHIPPING_PERWEIGHTUNIT_COST	Shipping Cost per Unit	NOTE: When using this Shipping Module be sure to check the Tare settings in the Shipping/Packaging and set the Largest Weight high enough to handle the price, such as 5000.00 and the adjust the settings on Small and Large packages which will add to the price as well. The shipping cost will be used to determin shipping charges based on: Product Quantity * Units (products_weight) * Cost per Unit - in an order that uses this shipping method.
MODULE_SHIPPING_PERWEIGHTUNIT_HANDLING	Handling Fee	Handling fee for this shipping method.
MODULE_SHIPPING_PERWEIGHTUNIT_SORT_ORDER	Sort Order	Sort order of display.
MODULE_SHIPPING_PERWEIGHTUNIT_STATUS	Enable Per Weight Unit Shipping	Do you want to offer per unit rate shipping? Product Quantity * Units (products_weight) * Cost per Unit
MODULE_SHIPPING_PERWEIGHTUNIT_TAX_BASIS	Tax Basis	On what basis is Shipping Tax calculated. Options are Shipping - Based on customers Shipping Address Billing Based on customers Billing address Store - Based on Store address if Billing/Shipping Zone equals Store zone

PRODUCT_LIST_DESCRIPTION	Display Product Description	Do you want to display the Product Description? 0= OFF 150= Suggested Length, or enter the maximum number of characters to display
PRODUCT_LIST_SORT_ORDER_ASCENDING	Product Listing Ascending Sort Order	What do you want to use to indicate Sort Order Ascending? Default = +
PRODUCT_LIST_SORT_ORDER_DESCENDING	Product Listing Descending Sort Order	What do you want to use to indicate Sort Order Descending? Default = -

Stock == Stock configuration options (9)

STOCK_CHECK	Check stock level	Check to see if sufficient stock is available
STOCK_LIMITED	Subtract stock	Subtract product in stock by product orders
STOCK_ALLOW_CHECKOUT	Allow Checkout	Allow customer to checkout even if there is insufficient stock
STOCK_MARK_PRODUCT_OUT_OF_STOCK	Mark product out of stock	Display something on screen so customer can see which product has insufficient stock
STOCK_REORDER_LEVEL	Stock Re-order level	Define when stock needs to be re-ordered
SHOW_PRODUCTS_SOLD_OUT	Products status in Catalog when out of stock should be set to	Show Products when out of stock 0= set product status to OFF 1= leave product status ON
SHOW_PRODUCTS_SOLD_OUT_IMAGE	Show Sold Out Image in place of Add to Cart	Show Sold Out Image instead of Add to Cart Button 0= off 1= on
QUANTITY_DECIMALS	Product Quantity Decimals	Allow how many decimals on Quantity 0= off
SHOW_SHOPPING_CART_DELETE	Show Shopping Cart - Delete Checkboxes or Delete Button	Show on Shopping Cart Delete Button and/or Checkboxes 1= Delete Button Only 2= Checkbox Only 3= Both Delete Button and Checkbox
SHOW_SHOPPING_CART_UPDATE	Show Shopping Cart - Update Cart Button Location	Show on Shopping Cart Update Cart Button Location as: 1= Next to each Qty Box 2= Below all Products 3= Both Next to each Qty Box and Below all Products

Logging == Logging configuration options (10)

STORE_PAGE_PARSE_TIME	Store Page Parse Time	Store the time it takes to parse a page
STORE_PAGE_PARSE_TIME_LOG	Log Destination	Directory and filename of the page parse time log
STORE_PARSE_DATE_TIME_FORMAT	Log Date Format	The date format
DISPLAY_PAGE_PARSE_TIME	Display The Page Parse Time	Display the page parse time on the bottom of each page You do not need to store the times to display them in the Catalog
STORE_DB_TRANSACTIONS	Store Database Queries	Store the database queries in the page parse time log (PHP4 only)

Regulations == Regulation options (11)

DISPLAY_CONDITIONS_ON_CHECKOUT	Confirm Terms and Conditions During Checkout Procedure	Show the Terms and Conditions during the checkout procedure which the customer must agree to.
DISPLAY_PRIVACY_CONDITIONS	Confirm Privacy Notice During Account Creation Procedure	Show the Privacy Notice during the account creation procedure which the customer must agree to.

E-Mail Options == General settings for E-Mail transport and HTML E-Mails (12)

EMAIL_TRANSPORT	E-Mail Transport Method	Defines if this server uses a local connection to sendmail or uses an SMTP connection via TCP/IP. Servers running on Windows and MacOS should change this setting to SMTP. SMTPAUTH should only be used if your server requires SMTP authorization to send messages. You must also configure your SMTPAUTH settings in the appropriate fields in this admin section. "Sendmail -f" is only for servers which require the use of the -f parameter to send mail. This is a security setting often used to prevent spoofing. Will cause errors if your host mailserver is not configured to use it.
EMAIL_LINEFEED	E-Mail Linefeeds	Defines the character sequence used to separate mail headers.
EMAIL_USE_HTML	Use MIME HTML When Sending Emails	Send e-mails in HTML format
ENTRY_EMAIL_ADDRESS_CHECK	Verify E-Mail Addresses Through DNS	Verify e-mail address through a DNS server
SEND_EMAILS	Send E-Mails	Send out e-mails
EMAIL_ARCHIVE	Email Archiving Active?	If you wish to have email messages archived/stored when sent, set this to "true".
EMAIL_FRIENDLY_ERRORS	E-Mail Friendly-Errors	Do you want to display friendly errors if emails fail? Setting this to false will display PHP errors and likely cause the script to fail. Only set to false while troubleshooting, and true for a live shop.
STORE_OWNER_EMAIL_ADDRESS	Email Address (Displayed to Contact you)	Email address of Store Owner. Used as "display only" when informing customers of how to contact you.
EMAIL_FROM	Email Address (sent FROM)	Address from which email messages will be "sent" by default. Can be over-ridden at compose-time in admin modules.
EMAIL_SEND_MUST_BE_STORE	Emails must send from known domain?	Does your mailserver require that all outgoing emails have their "from" address match a known domain that exists on your webserver? This is often set in order to prevent spoofing and spam broadcasts. If set to Yes, this will cause the email address (sent FROM) to be used as the "from" address on all outgoing mail.
ADMIN_EXTRA_EMAIL_FORMAT	Email Admin Format?	Please select the Admin extra email format
SEND_EXTRA_ORDER_EMAILS_TO	Send Copy of Order Confirmation Emails To	Send COPIES of order confirmation emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_CREATE_ACCOUNT_EMAILS_TO_STATUS	Send Copy of Create Account Emails To - Status	Send copy of Create Account Status 0= off 1= on
SEND_EXTRA_CREATE_ACCOUNT_EMAILS_TO	Send Copy of Create Account Emails To	Send copy of Create Account emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_TELL_A_FRIEND_EMAILS_TO_STATUS_US	Send Copy of Tell a Friend Emails To - Status	Send copy of Tell a Friend Status 0= off 1= on
SEND_EXTRA_TELL_A_FRIEND_EMAILS_TO	Send Copy of Tell a Friend Emails To	Send copy of Tell a Friend emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_GV_CUSTOMER_EMAILS_TO_STATUS_US	Send Copy of Customer GV Send Emails To - Status	Send copy of Customer GV Send Status 0= off 1= on
SEND_EXTRA_GV_CUSTOMER_EMAILS_TO	Send Copy of Customer GV Send Emails To	Send copy of Customer GV Send emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_GV_ADMIN_EMAILS_TO_STATUS	Send Copy of Admin GV Mail Emails To - Status	Send copy of Admin GV Mail Status 0= off 1= on
SEND_EXTRA_GV_ADMIN_EMAILS_TO	Send Copy of Customer Admin GV Mail Emails To	Send copy of Admin GV Mail emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_DISCOUNT_COUPON_ADMIN_EMAILS_TO_STATUS	Send Copy of Admin Discount Coupon Mail Emails To - Status	Send copy of Admin Discount Coupon Mail Status 0= off 1= on
SEND_EXTRA_DISCOUNT_COUPON_ADMIN_EMAILS_TO	Send Copy of Customer Admin Discount Coupon Mail Emails To	Send copy of Admin Discount Coupon Mail emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_ORDERS_STATUS_ADMIN_EMAILS_TO_STATUS	Send Copy of Admin Orders Status Emails To - Status	Send copy of Admin Orders Status Status 0= off 1= on

E-Mail Options == General settings for E-Mail transport and HTML E-Mails (12)

SEND_EXTRA_ORDERS_STATUS_ADMIN_EMAILS_TO	Send Copy of Admin Orders Status Emails To	Send copy of Admin Orders Status emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SEND_EXTRA_REVIEW_NOTIFICATION_EMAILS_TO_STATUS	Send Notice of Pending Reviews Emails To - Status	Send copy of Pending Reviews Status 0= off 1= on
SEND_EXTRA_REVIEW_NOTIFICATION_EMAILS_TO_O	Send Notice of Pending Reviews Emails To O	Send copy of Pending Reviews emails to the following email addresses, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
CONTACT_US_LIST	Set "Contact Us" Email Dropdown List	On the "Contact Us" Page, set the list of email addresses , in this format: Name 1 <email@address1>, Name 2 <email@address2>;
ALLOW_GUEST_TO_TELL_A_FRIEND	Allow Guest To Tell A Friend	Allow guests to tell a friend about a product. If set to [false], then tell-a-friend will prompt for login if user is not already logged in.
CONTACT_US_STORE_NAME_ADDRESS	Contact Us - Show Store Name and Address	Include Store Name and Address 0= off 1= on
SEND_LOWSTOCK_EMAIL	Send Low Stock Emails	When stock level is at or below low stock level send an email 0= off 1= on
SEND_EXTRA_LOW_STOCK_EMAILS_TO	Send Low Stock Emails To	When stock level is at or below low stock level send an email to this address, in this format: Name 1 <email@address1>, Name 2 <email@address2>;
SHOW_NEWSLETTER_UNSUBSCRIBE_LINK	Display "Newsletter Unsubscribe" Link?	Show "Newsletter Unsubscribe" link in the "Information" side-box?
AUDIENCE_SELECT_DISPLAY_COUNTS	Audience-Select Count Display	When displaying lists of available audiences/recipients, should the recipients-count be included? (This may make things slower if you have a lot of customers or complex audience queries)
EMAIL_SMTPAUTH_MAILBOX	SMTP Email Account Mailbox	Enter the mailbox account name (me@mydomain.com) supplied by your host. This is the account name that your host requires for SMTP authentication. Only required if using SMTP Authentication for email.
EMAIL_SMTPAUTH_MAIL_SERVER	SMTP Email Mail Host	Enter the DNS name of your SMTP mail server. ie: mail.mydomain.com or 55.66.77.88 Only required if using SMTP Authentication for email.
EMAIL_SMTPAUTH_MAIL_SERVER_PORT	SMTP Email Mail Server Port	Enter the IP port number that your SMTP mailserver operates on. Only required if using SMTP Authentication for email.
EMAIL_SMTPAUTH_PASSWORD	SMTP Email Account Password	Enter the password for your SMTP mailbox. Only required if using SMTP Authentication for email.
CURRENCIES_TRANSLATIONS	Convert currencies for Text emails	What currency conversions do you need for Text emails? Default = &pound;;GBP:&euro;;EUR

Attribute Settings == Configure products attributes settings (13)

DOWNLOAD_ENABLED	Enable Downloads	Enable the products download functions.
DOWNLOAD_BY_REDIRECT	Download by Redirect	Use browser redirection for download. Disable on non-Unix systems. Note: Set /pub to 777 when redirect is true
DOWNLOAD_IN_CHUNKS	Download by streaming	If download-by-redirect is disabled, and your PHP memory_limit setting is under 8 MB, you might need to enable this setting so that files are streamed in smaller segments to the browser. Has no effect if Download By Redirect is enabled.
DOWNLOAD_MAX_DAYS	Download Expiration (Number of Days)	Set number of days before the download link expires. 0 means no limit.
DOWNLOAD_MAX_COUNT	Number of Downloads Allowed - Per Product	Set the maximum number of downloads. 0 means no download authorized.
DOWNLOADS_ORDERS_STATUS_UPDATED_VALUE	Downloads Controller Update Status Value	What orders_status resets the Download days and Max Downloads - Default is 4
DOWNLOADS_CONTROLLER_ORDERS_STATUS	Downloads Controller Order Status Value >= lower value	Downloads Controller Order Status Value - Default >= 2 Downloads are available for checkout based on the orders status. Orders with orders status greater than this value will be available for download. The orders status is set for an order by the Payment Modules. Set the lower range for this range.
DOWNLOADS_CONTROLLER_ORDERS_STATUS_END	Downloads Controller Order Status Value <= upper value	Downloads Controller Order Status Value - Default <= 4 Downloads are available for checkout based on the orders status. Orders with orders status less than this value will be available for download. The orders status is set for an order by the Payment Modules. Set the upper range for this range.
ATTRIBUTES_ENABLED_PRICE_FACTOR	Enable Price Factor	Enable the Attributes Price Factor.
ATTRIBUTES_ENABLED_QTY_PRICES	Enable Qty Price Discount	Enable the Attributes Quantity Price Discounts.
ATTRIBUTES_ENABLED_IMAGES	Enable Attribute Images	Enable the Attributes Images.
ATTRIBUTES_ENABLED_TEXT_PRICES	Enable Text Pricing by word or letter	Enable the Attributes Text Pricing by word or letter.
TEXT_SPACES_FREE	Text Pricing - Spaces are Free	On Text pricing Spaces are Free 0= off 1= on
PRODUCTS_OPTIONS_TYPE_READONLY_IGNORE	Read Only option type - Ignore for Add to Cart	When a Product only uses READONLY attributes, should the Add to Cart button be On or Off? 0= OFF 1= ON

GZip Compression == GZip compression options (14)

GZIP_LEVEL

Enable GZip Compression

0= off 1= on

Sessions == Session options (15)

SESSION_WRITE_DIRECTORY	Session Directory	If sessions are file based, store them in this directory.
SESSION_FORCE_COOKIE_USE	Force Cookie Use	Force the use of sessions when cookies are only enabled.
SESSION_USE_FQDN	Cookie Domain	If True the full domain name will be used to store the cookie, e.g. www.mydomain.com. If False only a partial domain name will be used, e.g. mydomain.com. If you are unsure about this, always leave set to true.
SESSION_CHECK_SSL_SESSION_ID	Check SSL Session ID	Validate the SSL_SESSION_ID on every secure HTTPS page request.
SESSION_CHECK_USER_AGENT	Check User Agent	Validate the clients browser user agent on every page request.
SESSION_CHECK_IP_ADDRESS	Check IP Address	Validate the clients IP address on every page request.
SESSION_BLOCK_SPIDERS	Prevent Spider Sessions	Prevent known spiders from starting a session.
SESSION_RECREATE	Recreate Session	Recreate the session to generate a new session ID when the customer logs on or creates an account (PHP >=4.1 needed).
SESSION_IP_TO_HOST_ADDRESS	IP to Host Conversion Status	Convert IP Address to Host Address Note: on some servers this can slow down the initial start of a session or execution of Emails

GV Coupons == Gift Vouchers and Coupons (16)

DEFAULT_ZERO_BALANCE_ORDERS_STATUS_ID	Default Order Status For Zero Balance Orders	When an order's balance is zero, this order status will be assigned to it.
SECURITY_CODE_LENGTH	Length of the redeem code	Enter the length of the redeem code The longer the more secure
NEW_SIGNUP_DISCOUNT_COUPON	New Signup Discount Coupon ID#	Select the coupon
NEW_SIGNUP_GIFT_VOUCHER_AMOUNT	New Signup Gift Voucher Amount	Leave blank for none Or enter an amount ie. 10 for \$10.00
MAX_DISPLAY_SEARCH_RESULTS_DISCOUNT_COUPONS	Maximum Discount Coupons Per Page	Number of Discount Coupons to list per Page
MAX_DISPLAY_SEARCH_RESULTS_DISCOUNT_COUPONS_REPORTS	Maximum Discount Coupon Report Results Per Page	Number of Discount Coupons to list on Reports Page

Credit Cards == Credit Cards Accepted (17)

CC_ENABLED_VISA	Credit Card Enable Status - VISA	Accept VISA 0= off 1= on
CC_ENABLED_MC	Credit Card Enable Status - MasterCard	Accept MasterCard 0= off 1= on
