import_products

imports products & categories from a flat-file into zen-db

#) look at: import_columns.txt == column maping struc
a line like this means:

products_description	products_description	description_en	2	Hugo was Here
table_name	fieldname	Headername= **Name In Import.txt**	language_id	defaultvalue

!!important: delimeter == tab (in all import files)
DON'T USE PREFIX (ZEN_ ..)

#) look at: admin/import_products/import.*
place in the first row the headernames from 4)
numbers must have the form: 12346.123 (decimal seperator == . (point))

#) place in import_products the file named import.txt

#) goto zen admin / extras / product import == click on import
